Cabinet Lock Overview
Areas of application:

- Data server cabinets
- File and document storage
- Equipment storage
- Display cases
- Controlled substance secure storage
- Evidence chain of custody (CoC) control
- Smart lockers
- Medical or chemical storage
- Flaps on mail receiving facilities, interlocks, postal distribution systems

As the access control industry continues to evolve, non-traditional openings such as cabinets represent a significant opportunity for growth. Whether it’s lockers, drawers or doors, cabinet locks have become one of the fastest growing areas of the physical security industry giving security professionals the opportunity to enter new business segments and secure more openings than ever before.

From server cabinets to employee lockers and other supply and storage cabinets, we offer a complete suite of flexible solutions to meet your needs.

- Low profile solutions for compact applications
- Traditional and integrated access control options
- Choice of wired and wireless

Server Cabinets

HES offers robust, cost-effective swing handle server cabinet locking solutions to protect critical assets and mitigate risks in order to prevent data breaches. From single server cabinets to large co-location facilities we have the solution.

- Flexible
- Scalable
- Repeatable
**610 Series Cabinet Lock**

The versatile, compact, cost effective cabinet lock that can be used to secure drawers or doors. The HES 610 is available with or without locked state monitoring and has over 200 lbs of holding force.

- CBL12-QC12 » K200/KS200 System Side Interface Cable: 12 Foot, 12 Conductor and Molex One End, Pinned One End

*100 series only
The KS Series server cabinet lock is designed to integrate seamlessly with existing access control systems and protect critical assets from intrusion and expensive downtime. Designed to install easily on most swing handle server cabinet doors, the KS Series comes standard with locked state monitoring and utilizes an SFIC (Small Format Interchangeable Core) mechanical key override. An additional optional extended DPS monitoring sensor can be connected to ensure that the cabinet is closed, locked and secure.

**KS100 Series Wireless Cabinet Lock with Aperio® Technology**
- Supports either HID® 125 kHz Prox or 13.56 MHz iCLASS® SE contactless credentials
- Hard powered by IEEE 802.3af PoE, 48VDC or 24VDC (+/-10%)
- Optional factory pre-paired lock and hub kits available

**KS200 Series Integrated Wiegand Cabinet Lock**
- Featuring HID multiCLASS SE® contactless card technology
- Hard powered by 12-24VDC (+/-10%)
- Optional ElectroLynx™ interface cables available
