PERSONA Campus™ Online

Advanced, flexible access control software

ASSA ABLOY

Brought to you by ASSA ABLOY Group brands:
CORBIN RUSSWIN | SARGENT
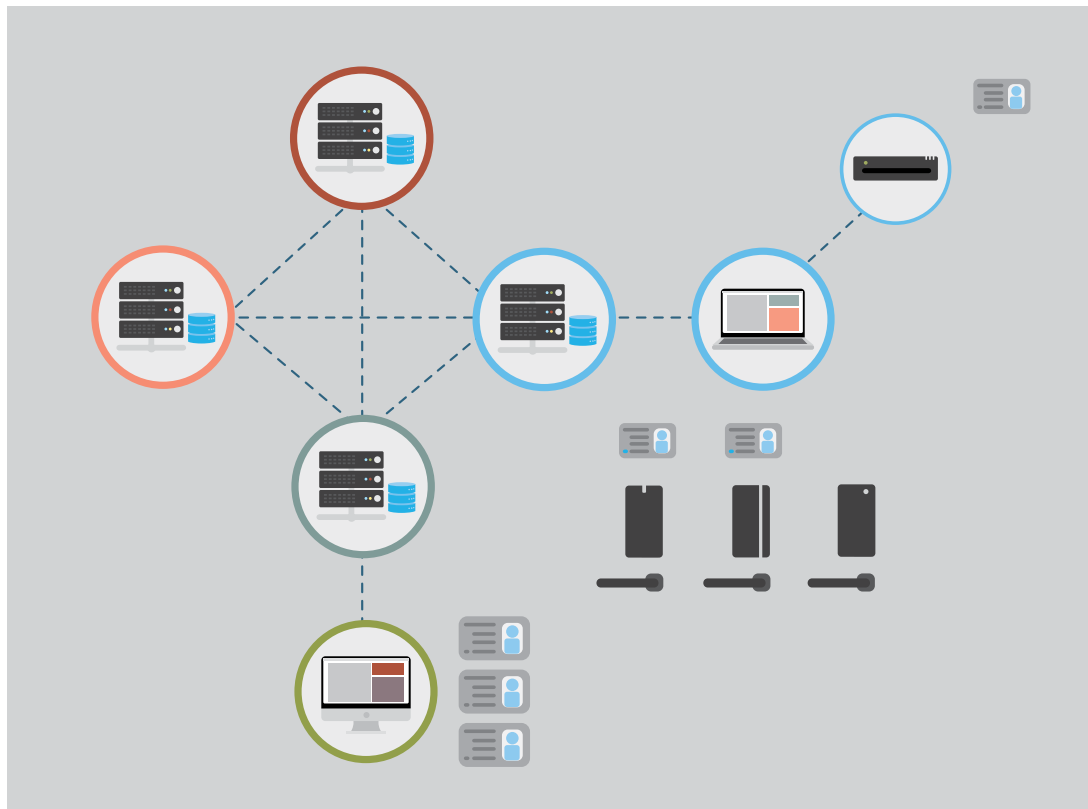

The global leader in
door opening solutions

PERSONA Campus™ Online access control software enables customized access by user, facility, or individual lock, and works with a variety of offline, Power over Ethernet (PoE) and WiFi locks available from ASSA ABLOY Group brands Corbin Russwin and SARGENT. It provides seamless database integration and software interface with popular enterprise, transactional and housing systems. Campus™ software supports both mag stripe and contactless technology, allowing easy migration to higher security credentials and HID Mobile Access®.

PERSONA Campus Online extends our Campus 1000™ offline system into online access control with a robust and feature rich platform. While offering seamless integration to the PERSONA offline system, Campus™ Online is a full featured, independent system. Whether you select the Online software package as stand-alone or choose to run Campus™ Online and Offline together, you can count on a consistent, web-based user experience.

PERSONA Campus™ Online Capabilities

Feature	Benefit
Intuitive browser-based application	• Easily accessible from any location • Needs little or no training
Multi-user SQL server	• Scalable from a single PC to a global network • Provides speed and ease of integration
Auto-discovery	• Simplifies configuration of new devices
Open architecture	• Ensures easy integration with other systems and allows code modification
Complete customization	• Provides flexibility to suit staff needs
Configurable alarm notification via client application, web browser and email	• Enables immediate response to events
Partitioned database	• Allows you to separate objects such as readers, cards, cardholders, and event data (including alarms) • Ideal for multi-departmental systems
Threat level management	• Allows designated staff members to secure the campus in the event of a threat or incident • Enables lockdown of one or multiple buildings in the push of a button
Advanced reporting tool	• Provides complete system visibility and flexible reporting options
Role-based security	• Facilitates granting and revoking privileges
Escape Return functionality	• Offers compliance for residential requirements in Canada

Comprehensive Campus Solutions
